Notice of Public Briefing on Patent Maintenance Fee Payment Procedure

The Patent and Trademark Office is in the process of designing and implementing a system for receiving and recording maintenance fees which are required for patents based on applications filed on and after December 12, 1980. Provisions relating to maintenance fees are found in both Public Laws 96-517 and 97-247. A proposed rule change notice is also being prepared.

It is considered to be extremely desirable to have a close coordination between the procedures and records maintained in the Patent and Trademark Office and those maintained by organizations and individuals responsible for paying maintenance fees including service organizations.

Accordingly, the Patent and Trademark Office is presenting a public briefing of its maintenance fee payment plans on February 22, 1984 at 1:00 pm at the Crystal City Marriott Hotel, 1999 Jefferson Davis Highway (U.S. Rt. 1), Arlington, Virginia 22202.

Any questions concerning the briefing should be addressed to R. Franklin Burnett at (703) 557-3054.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The libraries listed herein, designated as patent depository libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent months or years in some libraries to all or most of the patents issued since 1870, or earlier, in other libraries.

These patent collections are open to public use and each of the patent depository libraries, in addition, offers the publications of the patent classification system (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Depending upon the library, the patents may be available in microfilm, in bound volumes of paper copies, or in some combination of both. Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the patent depository libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
